

SUPERVAC™

VacTrack™

Electronically monitors performance and signals when to empty canister and service motor. VacTrack™ is also available in the SuperHose™ handle.

Ametek motors

All SuperVac™ units are powered by the leading manufacturer in vacuum motor technology. HAYDEN uses the most powerful vacuum motors available to run on household current.

Cyclonic Separation

The most advanced method to separate dust and debris. Maintains maximum airflow for continuous cleaning power and longer motor life.

High efficiency cartridge filters

The most important component for motor protection. No bags, screens or so-called "self cleaning" systems. Washable filter in the Premier. Advanced re-useable filter in all other models.

Injection molded canister

High impact, high temperature, flame retardant ABS. Will last a lifetime without rusting or denting.
